

WUOMA

FOR THE MOST IMPORTANT ROOM

Durability meets modern style

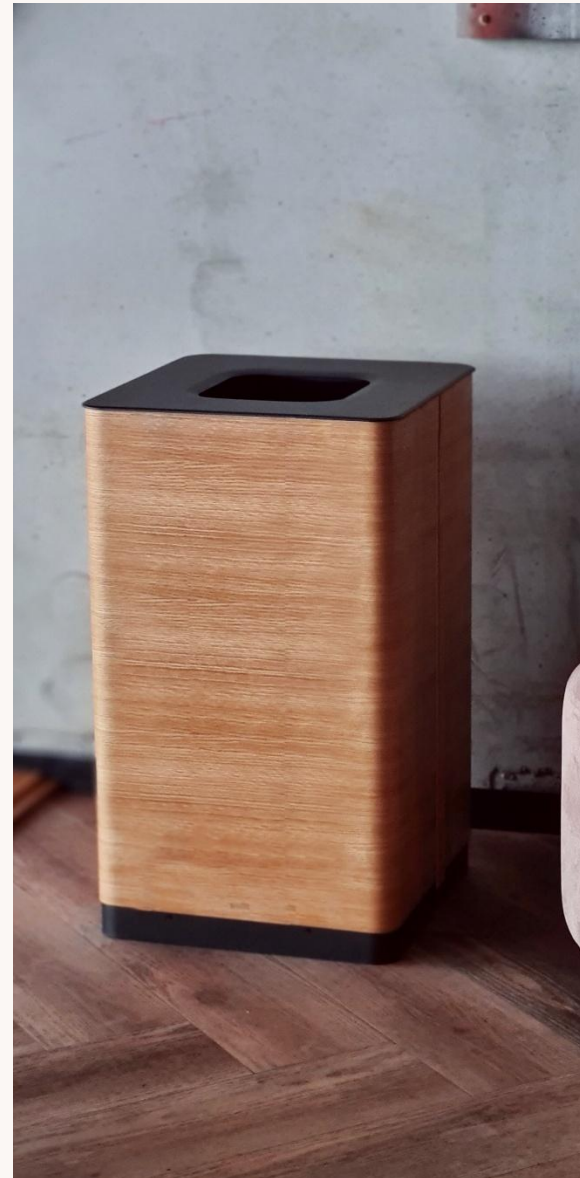

WUOMA sorting bins are designed to withstand demanding public environments. Cross-laminated, bent and specially lacquered genuine wood veneers ensure a long service life. In addition to their durable and refined appearance, the bins offer an environmentally friendly alternative to plastic and metal solutions.

All our products are manufactured using high-quality processes, and recycled materials are used whenever possible.

Our manufacturing method is designed to minimize material waste.

WUOMA

"Our cleaning staff have given very positive feedback on the solution. The inner container is an important part of the overall design – waste bags occasionally have small holes, and the inner container prevents liquids from leaking into the structure of the bin. This makes maintenance easier and significantly improves hygiene."

— Hannu Pohjola, Facility Manager, Colliers

Waste sorting is required by law – Famolas makes it easy and stylish

Businesses are required to sort waste in accordance with local waste management regulations. Wuoma's solutions make meeting these requirements effortless.

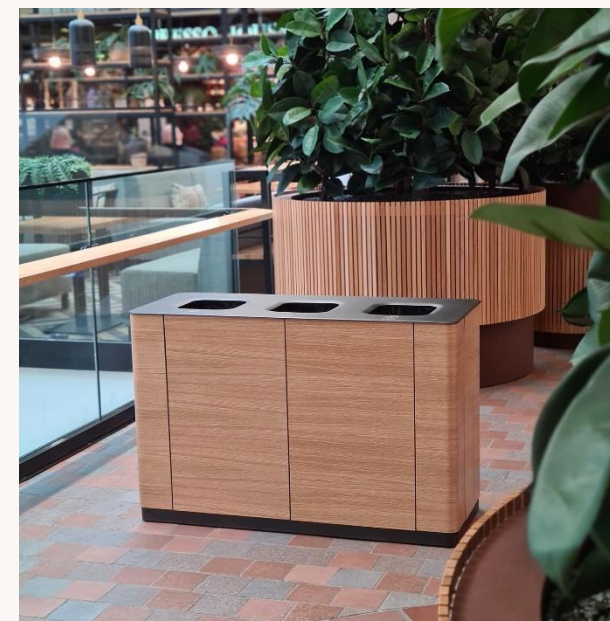

Durable and carefully designed sorting bins combine practicality with aesthetics, bringing a refined look to spaces while providing customers with a clear and intuitive sorting experience.

Container volume: 50 L
Designer: Visa Meisalmi

Waste symbols can be customized according to your needs – you name it!

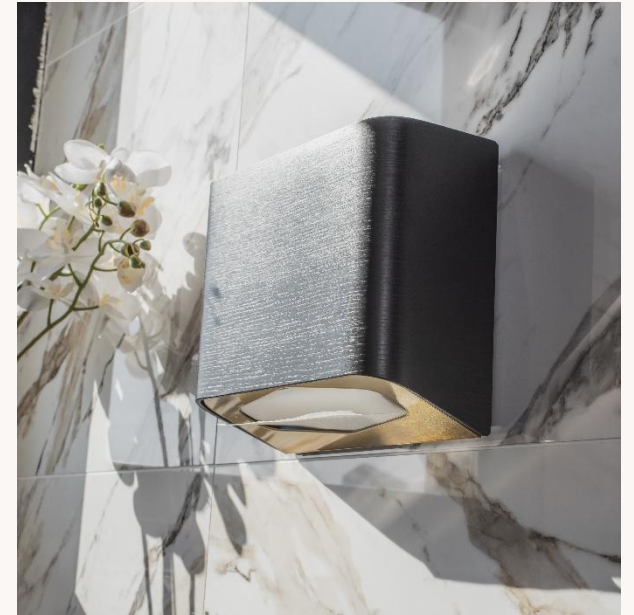

The products meet the hygiene, fire safety and functional requirements of public environments.

WUOMA

Wuoma also offers...

We manufacture high-quality dispensers and restroom accessories for public environments. Our soap and paper dispensers are designed to work with the most common liquids and paper types, so you are not tied to specific refill products.

On many markets, dispensers may appear almost free of charge, but they only work with the manufacturer's own liquids and paper. With Wuoma's solutions, you are free to choose your refill products – which often makes a high-quality dispenser the more cost-effective option in the long run.

THANK YOU!

Let's create the right solution
for you.
